

Project under the incentives programme related to self-consumption and storage, with renewable energy sources, as well as the implementation of renewable thermal systems in the residential sector within the framework of the Recovery, Transformation and Resilience Plan, financed by the European Union – NextGenerationEU

## #RecoveryPlan

**Title of the project:** SOLAR PHOTOVOLTAIC INSTALLATION FILLABOA

**Beneficiary:** BODEGAS FILLABOA, S.A.

**Total investment:** 27,352.00 €

**Amount of aid:** 5,470.40 €.

### **Description of project:**

The project was carried out at the facilities of BODEGAS FILLABOA, S.A., in Salvaterra de Miño and the following actions were taken:

The installation of 70 photovoltaic modules of 545 Wp unit power, 38.15 kWp in total on the roof of the industrial plant. The installation of 30 kW nominal power in inverters, without surplus.

This project generates savings in the plant's electricity consumption through the generation of renewable solar electricity, avoiding the generation of greenhouse gases and the consumption of natural resources from non-renewable energy sources.
